

Only connect ProgrammingArduino
when programming KCX_BT_EMITTER
Bluetooth audio transmitter module

Programming Arduino does not need to be a Nano.
It must be Arduino with 5V interfaces.
Power via USB and use Serial Monitor to control.

Connection to ProgrammingArduino:
9_TX – Yellow
2_RX – Green
GND – Black

Note: label TX/RX refers to the KCX_BT_EMITTER chip.
Usage in Programming Arduino is reversed from that.
